

## INTEROFFICE MEMORANDUM

**DATE:** June 26, 1987

**TO:** BRIDGE DESIGN PERSONNEL  
**FROM:** Veral Pinkerton, Bridge Engineer  
**SUBJECT:** Spray Painting of Concrete Surfaces

When you want to require that concrete be painted, such as on grade separation piers, outside face of rail and slab underneath the cantilever, follow this procedure:

1. Include Special Provision 802-7. (Note that this is for white only. Other colors will require a Job SP).
2. Add this note on the layout of each bridge that you want painted. "A sprayed concrete finish shall be used on surfaces specified in Special Provision 802-7." (A Job SP will be required if SP 802-7 doesn't specify the surfaces you want painted).
